***Response to Amendment***

Applicants' amendment filed on April 13, 2007 has been entered and forwarded to the examiner on June 22, 2007.

Therefore claims 27-28 and 30-34 as previously recited are currently pending in the Application.

Claim 29 was previously cancelled.

***Allowable Subject Matter***

Claims 27-28 and 30-34 are allowed.

The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim ( 27 ) including "wherein a first side wall is located at an end\_of the first gate electrode in the first direction, a second side wall is located at an end of the second gate electrode in the first direction, and the first side wall is directly physically and without the presence of additional layers there between connected to the second\_side wall above the

isolation element when viewed from a direction perpendicular to the first direction, as stated in Applicants' arguments filed on April 13, 2007 page 3 etc. that APPR figs. do not show first and second electrodes as recited above ( see parent 6,184,083 for method claims ).
